MEMORANDUM

September 12, 2023

TO: Honorable Mayor and City Commission

VIA: James Slaton, City Manager
Sarah B. Kirkland, Public Works Director

FROM: Nancy Hernandez, Utilities Support Manager

SUBJECT: Award of Bid to Odyssey Manufacturing Company for the Purchase of Sodium Hypochlorite

SYNOPSIS: The City's Utilities Department made a request for bid for the purchase of sodium hypochlorite, which is a necessary chemical to aid in the water and wastewater treatment process.

STAFF RECOMMENDATION

It is recommended that the City Commission:

1. Award the bid to Odyssey Manufacturing Company for the purchase of Sodium Hypochlorite.
2. Authorize the City Manager to execute the appropriate documents, on the City's behalf in regards to this purchase.

BACKGROUND

Disinfection technology and chemical treatment for wastewater and water has been consistent with the use of Chlorine as the standard chemical to safely and effectively treat both water and wastewater media. Delivery of chlorine to the flow stream ranges from gaseous, liquid and carrier chemical agents. Today, through the development and realization towards improving safety and reducing risk, Sodium Hypochlorite (NaOCl) is commonly used in various applications where disinfection or sterilization of both wastewater and water are needed. NaOCl is becoming more and more popular based on its inherent chemical characteristics of being a safer, less costly, lower risk chemical and still an effective means to treat wastewater media. Sodium hypochlorite is essential in the treatment of both water and wastewater processing, killing pathogens that could prove to be harmful to humans.

Staff made a request for bid for the purchase of sodium hypochlorite, with a bid open date of September 11, 2023. There were two responsive bidders, Odyssey Manufacturing Corporation and Allied Universal Corporation, with Odyssey Manufacturing Corporation being the apparent low bidder at \$1.70 per gallon. Therefore, staff recommends the commission approve the following action to award the bid for purchase of bulk Sodium Hypochlorite to Odyssey Manufacturing Corporation. The initial contract terms as stated in the attached agreement calls for the initial contract period to begin on October 1, 2023 and expire on September 30, 2024, if approved by the Commission. This agreement will renew annually on October 1 of each year for up to two (2) additional one (1) year periods.

OTHER OPTION

None at this time. This chemical is necessary in the water and wastewater treatment process.

FISCAL IMPACT

The FY 23-24 Operating Budget for Wastewater Operating Supplies – Chemicals has allocated \$100,000.00 for this purchase.

The FY 23-24 Operating Budget for Water Operating Supplies – Chemicals has allocated \$50,000.00 for this purchase.

Odyssey Manufacturing is pleased to offer the City of Lake Wales a delivered price of \$1.70 per gallon for its Ultrachlor 12.5 Trade Percent sodium hypochlorite for the entire initial term of the contract for the "tanker" deliveries. Enclosures (1) through (20) are provided to assist in the City of Lake Wales's Bid Evaluation. Additionally, Odyssey makes the following claims or warrants:

- Enclosures (1) through (9) are required submittals as outlined in the Request for Bids.
- Enclosure (10) is an Authority to Sign Letter
- Enclosure (11) is a copy of Odyssey's professional licenses including its General Contractor and Plumbing contractor licenses
- Enclosure (12) is Odyssey's Hillsborough County Occupational Licenses.
- Enclosure (13) is the Product Specification for Odyssey Ultrachlor sodium hypochlorite.
- Enclosure (14) is the NSF-60 certification for Odyssey Ultrachlor sodium hypochlorite.
- Enclosure (15) is a product Affidavit of Compliance.
- Enclosure (16) is the Third-party laboratory results for Odyssey Ultrachlor sodium hypochlorite as manufactured by Odyssey Manufacturing at its Tampa facility.
- The City of Lake Wales and the Town of Lake Hamilton both currently use Odyssey Manufacturing Co. and can pull samples at any of its water treatment or wastewater treatment plants to ascertain the quality of its sodium hypochlorite.
- Enclosure (17) is a list of References is Attached to aid in the Proposal Evaluation. Almost all of these references have used not only Odyssey Manufacturing Co. but other suppliers and we would urge you to call them and compare the safety, reliability, quality and service of Odyssey to its competitors.
- Safety is extremely important and should be a major consideration in the Utility's "informed decision process". Odyssey Manufacturing has zero "Safety Incidents" in the past five years for any chemical that it sells (defined as all chemical accidents, incidents, releases, spills, and National Response Center Notifications ("safety incidents")).
- Emergency Preparedness Planning, Spill Response, Technical and Engineering Support and also emergency points of contact would be our Patrick H. Allman, General Manager (cellular 813-335-3444) who has a B.S. in Nuclear Engineering 1983 from the University of Virginia, Marvin Rakes, President (813-340-3675) who has a B.S. in Chemical Engineering 1985 from the University of North Carolina State or the on-duty Plant Supervisor (800-ODYSSEY). All technical and engineering assistance would be provided at no charge. As you know, Odyssey Manufacturing Co. has provided the City of Lake Wales numerous amounts of emergency and technical support along with technical assistance over the past twenty-two years much of it at no charge. This information can be attested to by the current group of managers and supervisors. For example, we designed, permitted and installed the sodium hypochlorite systems at each of the Lake Wales facilities including your latest facility the Park Water Treatment Plant (WTP) which was recently acquired. We have also done most of the service work including numerous emergency visits and technical responses.
- In addition to being the largest sodium hypochlorite supplier to the water and wastewater industry in Florida, Odyssey Manufacturing Co. is a licensed plumbing and general contractor who specializes in chemical system design, installation and repairs. Enclosure (11) is a copy of our plumbing and general contractor's licenses. We have installed over 3,000 chemical systems in Florida (including five for the City of Lake Wales) and have done service work for most of the utilities in Florida to whom we sell sodium hypochlorite (including the City of Lake Wales).
- Odyssey Manufacturing has no "Terminations" or "Debarments" as defined in your Solicitation in the past twenty-five years of its existence for any chemical that it sells.

- We will use no subcontractors or affiliates in the performance of any work under this proposal. This is in sharp contrast to other suppliers in the marketplace, all of whom use third party driving companies and who must subcontract out any service work since they are not licensed contractors.
- Enclosure (18) is a Safety Data Sheet (SDS).
- Enclosure (19) is a completed W-9 form.
- Enclosure (20) are OSHA 300 Logs for Odyssey Manufacturing Co.
- Odyssey Manufacturing Co. is a Drug Free Workplace and has an active program in-place to randomly test its employees.

Over the past twenty-five years since it was founded in 1998, Odyssey Manufacturing Co. has provided superior service to the water and wastewater industry including the City of Lake Wales including never missing a delivery, providing emergency support on numerous occasions and providing a significant amount of technical assistance. As you know, we are the only chemical manufacturer/distributor that is accessible and open for manufacturing and deliveries 24 hours per day and 7 days per week (including holidays) and can be reached @800-ODYSSEY or facsimile (813) 630-2589. Additionally, Odyssey Manufacturing also agrees to continue to provide unlimited technical assistance to the City of Lake Wales to assist it with its operations at no charge as part of the sodium hypochlorite supply. Such assistance includes, but is not limited to, operator training sessions, startup services, site inspections on behalf of the owner, drawing review, engineering and design. As a licensed contractor, Odyssey has performed over three thousand chemical system installations in the State of Florida and assisted with numerous others in addition to providing service work, spill response and temporary systems as required.

Odyssey sets the standard for reliability in the marketplace. We have never missed a delivery in over twenty-three years of service to the water and wastewater treatment industry. This should be the litmus test for reliability and should be factor in any Bid Evaluation particularly when considering a company with the same ownership and management in place for the past twenty-five years. In addition to never missing a delivery, we have consistently demonstrated the ability to respond to emergency requests for chemical deliveries or service work.

Please call our customers to compare Odyssey Ultrachlor with other suppliers! Because of its short shelf life, buying a superior quality sodium hypochlorite will result in significant savings. We have examined your specifications and can comply with all the requirements. Additionally, we hereby provide written assurance of compliance with OSHA, EPA, NSF, and AWWA regulations and consent to provide samples to the City of Lake Wales for testing if requested. We also agree to provide a safe handling training course and “refresher courses” for all of your chemicals for the duration of the contract. We take no exceptions to the bid documents. You may take a sample of our sodium hypochlorite at any time from any one of your facilities or off of a truck at time of delivery. Please call me if you have any questions at 1-800-ODYSSEY or cellular (813) 335-3444 or at e-mail pallman@odysseymanufacturing.com. Thank you for your consideration.

Sincerely,

Patrick H. Allman

In any and all claims against the City, or any of its officers, directors, agents, or employees by any employee of the Contractor, any Subcontractor, any person or organization directly or indirectly employed by any of them to perform or furnish any of the work or anyone for whose acts any of them may be liable, this indemnification obligation shall not be limited in any way by any limitation on the amount or type of damages, compensation, or benefits payable by or for the Contractor or any Subcontractor or other person or organization under workers' or workmen's compensation acts, disability benefit acts, or other employee benefit acts, nor shall this indemnification obligation be limited in any way by any limitation on the amount or type of insurance coverage provided by the City, the Contractor, or any of his Subcontractors. - [1] This product contains sulfite. Sulfites have been known to cause potentially lethal allergic reactions in sulfite-sensitive individuals. The maximum recommended allowable residual sulfite level in the finished drinking water is 100 ppb (0.1 mg/L).
- [2] For electrolytic sodium hypochlorite generator use of this product, the maximum disinfectant feed concentration shall not exceed 10 mg Cl₂/L. This requirement limits bromate production in the effluent sodium hypochlorite and is based on the bromide concentration in the salt.
- [HY] The residual levels of chlorine (hypochlorite ion and hypochlorous acid), chlorine dioxide, chlorate ion, chloramine and disinfection by-products shall be monitored in the finished drinking water to ensure compliance to all applicable regulations. Also, reference the AWWA B300 (Hypochlorites) standard's Recommendations for the Handling and Storage of Hypochlorite Solutions appendix for information on preservation techniques for hypochlorite bleach in transit and storage.

This report documents the testing of the referenced product to the requirements of NSF/ANSI/CAN Standard 60 (Drinking Water Treatment Chemicals - Health Effects). This standard establishes minimum requirements for chemicals, the chemical contaminants, and impurities that are added to drinking water from drinking water treatment chemicals. Contaminants produced as by-products through reaction of the treatment chemical with a constituent of the drinking water are not covered by this Standard. Reference the "About the Standard" section at the end of this report for additional information about NSF/ANSI/CAN Standard 60 and the products covered under this Standard.

Thank you for having your product tested by NSF.

Please contact your Project Manager if you have any questions or concerns pertaining to this report.

About the Standard:

NSF/ANSI/CAN Standard 60: Drinking Water Treatment Chemicals - Health Effects

NSF/ANSI/CAN 60 establishes minimum health effects requirements for the chemicals, the chemical contaminants, and the impurities that are directly added to drinking water from drinking water treatment chemicals. It does not establish performance or taste and odor requirements. The standard contains requirements for chemicals that are directly added to water and are intended to be present in the finished water as well as other chemical products that are added to water but are not intended to be present in the finished water. Chemicals covered by this Standard include, but are not limited to, coagulation and flocculation chemicals, softening, precipitation, sequestering, pH adjustment, and corrosion/scale control chemicals, disinfection and oxidation chemicals, miscellaneous treatment chemicals, and miscellaneous water supply chemicals.

The testing performed to this standard is done to estimate the level of contaminants or impurities added to drinking water when the chemical is used at the "Maximum Use Level" under attestation. Prior to testing, information is obtained on the formulation and sources of supply used to manufacture the chemical. This information is then reviewed along with the minimum requirements of the standard to establish the potential contaminants of concern. A representative sample of chemical is obtained for testing. The chemical sample is prepared for analysis through specific methods established in the standard based on the type of chemical and then is analyzed for potential contaminants determined during the formulation review. The laboratory results are normalized to represent potential at-the-tap values and then compared to the "single product allowable concentration" (SPAC) established by the standard. The product is found in compliance with the standard if the normalized value is less than or equal to the allowable concentration.

Loosen tight clothing such as a collar, tie, belt or waistband. If symptoms persist, seek medical attention immediately.

Eyes: Immediately flush eyes with large amounts of water for 15 minutes, occasionally lifting upper and lower lids. Remove contact lenses after the first 5 minutes and continue washing. Obtain immediate medical attention, preferably from an ophthalmologist.

Skin: Flush skin with large amounts of water while removing contaminated clothing. Wash affected area with soap and water. Wash contaminated clothing and shoes thoroughly before reuse. Seek prompt medical attention if rash develops.
Ingestion: Rinse mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

4.2 Most important symptoms and effects, both acute and delayed

Potential health symptoms and effects

Eyes: Causes severe eye irritation and burns. Symptoms include redness, pain, itching, burning sensation and tearing. Material is extremely destructive to eyes, mucous membranes and surrounding tissues.

Skin: Causes severe skin irritation and burns. Symptoms include redness, pain, itching and burning sensation. May be harmful if absorbed through the skin.

Inhalation: Vapors and mists may be harmful if inhaled, causing sore throat and cough. Material is extremely destructive to the tissue of the mucous membranes and upper respiratory tract.

Ingestion: May cause severe gastrointestinal tract irritation with abdominal pain, burning sensation, cough, diarrhea, sore throat and vomiting. May cause burns and irritation to mucous membranes of the mouth and to tissues of the digestive tract.

Chronic: Repeated or prolonged contact with spray mist may produce chronic eye irritation, severe skin irritation and/or respiratory tract irritation leading to frequent attacks of bronchial infection.

SECTION V - FIRE FIGHTING MEASURES

5.1 Extinguishable media

Suitable methods of extinction: Material does not burn. Use fire extinguishing media appropriate for surrounding materials.

Unsuitable methods of extinction: None listed

5.2 Special hazards arising from the substance or mixture

Closed containers may explode (due to the build-up of pressure) when exposed to extreme heat. During emergency conditions overexposure to toxic decomposition products may cause a health hazard. Fire may cause the evolution of chlorine, hydrogen chloride gas and chlorine oxides. Symptoms may not be immediately apparent. Obtain immediate medical attention.

5.3 Advice for firefighters

Full protective equipment including self-contained breathing apparatus should be used. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat. If possible, firefighters should control run-off water to prevent environmental contamination.

SECTION VI - ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Avoid breathing vapors/mists. Avoid contact with skin and eyes. Wear appropriate protective clothing designated in Section 8. Ventilate the area. Evacuate personnel to safe areas.

6.2 Environmental precautions

Avoid dispersal of spilled material or run-off and prevent contact with soil and entry into drains, sewers or waterways. Contain and recover liquid when possible.

6.3 Methods and materials for containment and cleaning up

Cover drains. Cover with a large quantity of inert absorbent (e.g. sand, vermiculite, kitty litter, dry earth). Do not use combustible materials such as saw dust. Collect product using a shovel and place into approved container for proper disposal as hazardous waste. For large spills use water spray to divert vapor drift. Observe possible material restrictions (section 7.2 and 10.5). Clean contaminated area with water. Do not mix with other cleaning agents that may liberate chlorine gas vapors.

US Regulations (CERCLA) require reporting spills and releases to soil water and air in excess of reportable quantities. Reportable quantity (RQ) for hypochlorite solutions is 45.36 kg (100 lbs).

Reportable Quantity (RQ): 100 lbs or 45.36 kg (approximately 100 gal or 378.5 L of Odyssey Ultrachlor 12.5 Trade Percent sodium hypochlorite). In the event of a spill (e.g. defined as any release to the environment), call Odyssey Manufacturing and/or the emergency contact numbers as soon as possible for assistance.

*****For releases higher than the Reportable Quantity (RQ), you must notify the State Emergency Response Commission at (800) 320-0519 AND the National Response Center at (800) 424-8802 or (202) 267-2675 within 15 minutes!!!*****

In the event of a spill, contact either hazardous chemical response company or Odyssey Manufacturing for assistance. Odyssey Manufacturing Co. has a contract with American Compliance Technology, Inc. (ACT) out of Bartow, Florida to perform emergency response and hazardous material and environmental services cleanup for its facilities, its transportation vehicles and its customer's facilities and transportation vehicles. They can be reached at 800-226-0911.

6.4 Reference to other sections

For indications about waste treatment, see section 13.

SECTION VII - HANDLING AND STORAGE

7.1 Precautions for safe handling

Observe label precautions. Avoid contact with skin and eyes. Wear all appropriate protective equipment specified in Section 8. Wash thoroughly after handling. Keep containers closed when not in use. Use proper equipment for lifting and transporting all containers.

Advice on protection against fire and explosion

Material is non-flammable and non-combustible.

7.2 Conditions for safe storage, including any incompatibilities

Keep in cool, dry, ventilated storage areas in closed containers. Protect against physical damage. Isolate from incompatible substances. Do not store near acids, heat, oxidizable materials or organics.

Store in a receptacle equipped with a vent. Transfer only to approved containers having correct labeling. Containers that have been opened should be carefully resealed and kept upright to prevent leakage. Do not take internally. Keep locked up and out of reach of children.

7.3 Specific end uses

Apart from the uses mentioned in section 1.2, no other specific uses are stipulated.

SECTION VIII - EXPOSURE CONTROLS AND PERSONNEL PROTECTION

8.1 Control parameters

Components	CAS Number	OSHA	ACGIH	AIHA (WEEL)
Sodium Hypochlorite	7681-52-9	2 mg/m ³ TWA; skin	0.5 ppm as CL ₂ TWA; 1 ppm as CL ₂ STEL, A4	2 mg/m ³ STEL
Sodium Hydroxide	1310-73-2	2 mg/m ³ TWA	2 mg/m ³ Ceiling	

8.2 Exposure controls

Engineering Measures: Technical measures and appropriate working operations should be given priority over the use of personal protective equipment. Use adequate ventilation. Local exhaust is preferable. See section 7.1.

Individual protection measures: Wear protective clothing to prevent repeated or prolonged contact with product. Protective clothing needs to be selected specifically for the workplace, depending on concentrations and quantities of hazardous substances handled. The chemical resistance of the protective equipment should be enquired at the representative supplier.

Hygiene measures: Facilities storing or using this material should be equipped with an eyewash station and safety shower. Change contaminated clothing. Preventive skin protection is recommended. Wash hands thoroughly after use, before eating, drinking or using the lavatory and at the end of the workday.

Eye/face protection: Wear tightly fitting protective goggles and a face shield (8-inch minimum). Refer to 29 CFR 1910.133, ANSI Z87.1 or European Standard EN 166.

Hand Protection: Wear gloves recommended by glove supplier for protection against materials in section 3. Gloves must be inspected prior to use. Gloves should be impermeable to chemicals and oil. Breakthrough time of selected gloves must be greater than the intended use period. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product.

Other protective equipment: Wear impervious, protective chemical resistant clothing including boots, gloves, lab coat, apron or coveralls as appropriate to the situation to prevent skin contact.

Respiratory Protection: Always use an approved respirator when vapor/aerosols are generated. Where risk assessment shows air-purifying respirators are appropriate use a full-faced respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Environmental exposure controls: Do not empty into drains.

10.2 Chemical stability

Stable under recommended storage conditions. Slowly decomposes on contact with air. Rate increases with the concentration and temperature. Exposure to sunlight accelerates decomposition. Sodium hypochlorite becomes less toxic with age.

10.3 Possibility of hazardous reactions

Avoid excessive heat and sources of ignition. Flammable hydrogen may be generated from contact with metals such as: aluminum, brass, tin, zinc and alloys of these metals. Avoid contact with acids, halogenated organics, organic nitro compounds and glycols. Hazardous gases may be generated from contact with acids, ammonium hydroxide (aqua ammonia), ammonium sulfate or cleaners containing ammonia compounds. Violent reactions may occur with some organic compounds. Sodium hypochlorite reacts readily with various reducing sugars (e.g. fructose, galactose, maltose, dry whey solids) to produce carbon monoxide. Precautions should be taken including atmospheric monitoring of the tank to ensure safety of personnel. Hazardous polymerization will not occur.

Acute inhalation toxicity

May cause severe bronchial irritation, sore throat with possible blistering, coughing, stomatitis, nausea, labored breathing, shortness of breath and pulmonary edema. 10-20 mg/m³ causes burning of the nose and throat. If sufficient amounts are absorbed, may cause effects as detailed in acute ingestion.

Acute dermal toxicity

Extent of damage depends on concentration, pH, and volume of solution and duration of contact. May cause redness, pain, blistering, itchy eczema and chemical burns. Sensitization reactions are possible in previously exposed persons.

Skin irritation

Skin irritation - 24 h (Rabbit)

Eye irritation

Rabbit, Adult – 10 mg, moderate irritation

May cause redness, pain, and blurred vision. Solutions of 5% splashed in human eyes have caused a burning sensation and later only slight superficial disturbance of the corneal epithelium which cleared completely in the next day or two without special treatment. However, one animal study reports a 5% solution causing only moderate irritation with clearing within 7 days. A higher concentration of 15% tested on rabbit eyes caused immediate severe pain, hemorrhages, rapid onset of ground-glass appearance of the corneal epithelium, moderate bluish edema of the whole cornea, chemosis and discharge for several days. Such eyes have sometimes healed in 2-3 weeks with slight or no residual corneal damage but they had neovascularization of the conjunctiva and distortion of the nictitating membrane by scarring.

Bidder Qualification/Submittals

For purposes of this Bid, the term "Bidder" shall be defined as the company submitting the proposal and shall include all subsidiaries, affiliates, and subcontractors. As such, any requested documentation shall apply to all subsidiaries and affiliated companies as well as any subcontractors. In the event that a company is using a subcontractor to either manufacture or deliver the product, the requested items (e.g., references, terminations, and safety incidents) shall apply to the subcontractor as well.

The awarded Bidder shall submit a 1500 ml "chilled" sample of their product representative of their manufacturing process from Bidder's manufacturing facility which would serve the customer to one of the approved testing laboratories listed in this Specification for analysis within the past ninety (90) days. The laboratory shall ascertain whether the Bidder's product is in compliance with this Specification for available chlorine, % sodium hypochlorite, excess caustic, iron, copper, nickel, chlorate, bromate and suspended solids (based on Filter Test time). The cost of the analysis shall be borne by Bidder. The results of the analysis shall be submitted with the Bidder's proposal. Failure to submit a sample or meet the requirements of the Specification shall result in Bidder being disqualified from bidding on this product.

Further, Purchaser reserves the right to take samples from Bidder's other customers to ensure that the Bidder's sample and delivery equipment is in compliance with all the requirements of this Specification and such a sample shall be judged representative of the Bidder's quality. The Bidder shall provide a customer contact and phone number in the same county as the Purchaser whereby the Purchaser may obtain sample of Bidder's product to check it for compliance with the Specification. It is the Purchaser's intention to deal directly with this customer. Purchaser may choose to obtain a sample from any of Bidder's customers, however, to ensure compliance with the Specification. In such event, Purchaser shall bear the cost of any analysis. Based on this compliance check, failure to meet the requirements of this Specification shall result in Bidder being disqualified from bidding on this Product.

Each prospective Bidder shall submit a list of at least three (3) references to include phone numbers that use or have used its sodium hypochlorite at both water and wastewater treatment plants (at least five of each type) in the past two years. The Reference List shall list actual users at the water and wastewater plants and not purchasing agents. Additionally, each Bidder shall provide the names of any customers where its contract was terminated early (e.g., debarred) for safety, quality, or service issues for any product it supplies over the past five years. The Bidder shall also provide a detailed listing of all accidents, incidents, releases, spills, vehicle accidents involving death or injury and National Response Center Notifications ("safety incidents") for all chemicals it delivers or manufacturers for the past five (5) years. Failure to disclose references, terminations, or safety incidents will result in Bidder being disqualified from bidding on this product.

As part of its Emergency Preparedness Planning and Spill Response Plan, each prospective Bidder shall submit a list with 24-hour access phone numbers of at least two degreed engineers (preferably Chemical Engineers) listing their degree, college or university and year of graduation, experienced in sodium hypochlorite operations to provide emergency support services on a 24/7 basis in the event of a spill, equipment failure or other emergency. Failure to submit this list including all the requirements of the list or to adhere to these requirements will result in Bidder being disqualified from bidding on this product.

As part of assessing the Bidder's reliability and safety record, the prospective Bidder shall include all regulatory actions including but not limited to, copies of any fines, correspondence and consent orders relating to the operation of ALL of its manufacturing and distribution facilities. Additionally, the Bidder shall submit a copy of its OSHA Form 300A/300 logs for the past three years (if the Bidder utilizes a third party driving company or affiliated company, then they shall submit the OSHA 300 logs for that company as well). The Purchaser may require a site visit to the Bidder's manufacturing and distribution facilities to assess their safety and reliability as part of the Bid Evaluation process.

Bid Evaluation

The Proposal Evaluation shall consider many factors including price, product quality, previous performance, safety, reliability, sample results and reference checks. Because of the hazardous nature of the product and the relatively short shelf-life of the product, strong consideration shall be given to the Bidder's quality, safety record, reliability, and previous performance in awarding the contract for the product.

Commercial Conditions (Pricing, Term and Payments)

The price of the sodium hypochlorite shall be fixed for the term of this Purchase Order and shall not be subject to any price escalation or fuel surcharges during the term of the Purchase Order. Suggested term is from one to three (3) years. All payments shall be NET 30 days.

Delivery Requirements

Contractor shall make “normal” deliveries within three (3) calendar (i.e., not “working” days) days after receipt of order and must make “emergency” deliveries within 24 hours. An emergency delivery is defined as a delivery which is necessary in order to prevent the Purchaser from running out of sodium hypochlorite in less than 36 hours. Purchaser shall endeavor to minimize the number of “emergency” deliveries.

The Contractor shall be responsible for any spills resulting from the failure of its or its subcontractor’s delivery equipment or from failure of attendant delivery personnel in the proper performance of their duties. Proper performance shall require attendant delivery personnel’s constant inspection and observation of unloading operations and knowledgeable response to problems or emergencies, which would most commonly be expected to occur. The Purchaser reserves the right to refuse any and all deliveries made with equipment that is poorly maintained and/or leaking sodium hypochlorite.

The tanks or trailers shall be clean and free of residue that may contaminate the Contractor’s product or impede the unloading process. It is the Contractor’s responsibility to verify the cleanliness of the transporting equipment before loading. All appurtenant valves, pumps, and discharge hoses used for the delivery of sodium hypochlorite shall be supplied by the Contractor and shall be clean and free from contaminating material. The Purchaser may reject a load if the equipment is not properly cleaned. The Contractor shall furnish a Purchaser approved, leak-free connection device between the trailer and the Purchaser’s intake receptacle. The Contractor shall observe the entire filling operation at each delivery site and shall immediately report any spills caused during the filling operations. The Contractor shall take immediate and appropriate actions to clean up any spilled liquid sodium hypochlorite. If the spill is not cleaned up, the Purchaser will hire a certified hazardous material handling company to clean up the spill, and the cost of such service will be charge to the Contractor and deducted from the amount due to the Contractor. If the Purchaser’s unloading equipment such as pipe, valves or level indication and alarms should fail and the spillage is not the fault of the Contractor or its subcontractor, the Contractor shall be relieved of cleanup of the spill.

Sampling and Testing Prior To Unloading

The Contractor's delivery trailer shall have a sample port to provide a sample for analysis prior to hooking up and unloading the trailer. The Contractor's delivery personnel (driver) shall be provide a sample of hypochlorite before the shipment is hooked up and unloaded in the presence of the Purchaser. The Purchaser will supply the sample container and the driver shall collect the sample from the tank truck and turn it over to the Purchaser. The sample shall be considered representative of the lot.

The Purchaser reserves the right to subject samples of the hypochlorite to quick analyses to ensure that it meets basic conditions of the specification with respect to specific gravity, weight percent of sodium hypochlorite, sodium hydroxide, and suspended solids. Any lot tested by the Purchaser that fails to comply with the specifications shall constitute grounds for rejection of that lot. No payment shall be made for hypochlorite that is rejected. The Contractor or its subcontractors shall allow 45 minutes for this testing to be completed. If testing cannot be completed within the 45-minute period, the Purchaser shall allow the Contractor to unload the shipment. In the event that the load is rejected, the Contractor shall have four (4) hours to supply another shipment. In the event that the Contractor is unable or unwilling to supply another shipment within this time period, Purchaser has the right to procure a shipment from another source. Two rejections of a lot or shipment in any twelve (12) month period shall constitute automatic termination of the Contractor's supply contract with the Purchaser.

Sampling and Test of Shipment after Unloading

The Purchaser reserves the right to subject samples of the hypochlorite to complete analyses to ensure that it meets EPA specifications, AWWA B300-99 specifications, and the supplemental specifications included with this document. Filter Test Time	< 3 minutes

The delivery time of the shipment shall not exceed 72 hours from the time of manufacture of the product. The suspended solids in the sodium hypochlorite delivered under this contract shall be minimized and the shipments delivered shall achieve a filtration time of less than 3 minutes for 1000 ml when applying the "*Suspended Solids Quality Test for Bleach Using the Vacuum Filtration*" Method developed by Novatek and previously referenced in this Specification.

The Contractor shall supply the sample container and the driver shall collect the sample from the tank truck. This sample will be given to the Purchaser at the time of the sample and the Purchaser forward the sample to the approved authorized testing agency. Any failure to comply with the specifications shall constitute grounds for cancellation of the contract between Purchaser and Contractor. 4. **NON-CONFORMANCE TO BID CONDITIONS:** Services not delivered as per delivery date in bid and purchase order may result in bidder being found in default, in which event any and all re-procurement costs may be charged against the defaulting vendor. This non-conformance to bid conditions may result in immediate cancellation of the purchase order.

- **ASSIGNMENT:** Any purchase order issued pursuant to this bid and the monies, which may become due herein, are not assignable, except with the prior written approval of the Purchase Director.
5. **DISPUTES:** In the event of any doubt or difference of opinion as to the methods provided herein, or the level of performance rendered, the decision of the user department/division director shall be final and binding on both parties.

 7. **PLACING OF ORDERS:** The award of this bid does not constitute an order. Before any services can be performed, the successful bidder must receive written or oral notification in accordance with the practices of the User Division.
 8. **PRECEDENCE:** Any requirement set forth in any section of the bid documents shall be binding as if called for by all sections. If there is a difference in the terms anywhere in this document, the most restrictive shall prevail.
 10. **ADDITIONS/REVISIONS/DELETIONS:** Additions, revisions or deletions to the general conditions, specifications or bid price sheets that change the intent of the bid will cause the bid to be non-responsive and the bid will not be considered. The Purchasing Agent shall be the sole Judge as to whether or not any addition, revision or deletion changes the intent of the bid.
 11. The Purchasing Agent reserves the right to terminate or suspend the award of this bid, in whole or in part, when it is in the best interest of the City to do so. The Purchasing Agent will notify the Vendor, in writing, of any such action with notice of the effective date of termination or suspension. The City reserves the right to cancel any bid after reasonable written notice to the successful bidder should the service not be in the best interest of the City.  13. **PLANS AND SPECIFICATIONS:** The specifications and other bid documents upon which the prices in the Vendor's bid proposal are based on, are hereby made a part of the purchase order by reference hereto.

14. **ANNUAL APPROPRIATIONS:** The vendor acknowledges that the City, during any fiscal year, shall not expend money, incur any liability, or enter into any agreement which, by its terms, involves the expenditure of money in excess of the amounts budgeted or the reduction of revenues for those budgeted agreements that may be available for expenditure during such fiscal year. Any agreement, verbal or written, made in violation of this subsection is null and void, and no money may be paid on such agreement. Nothing herein contained shall prevent the making of agreement for a period exceeding one year, but any agreement so made shall be executor only for the value of the services to be rendered or agreed to be paid for in succeeding fiscal years. Accordingly, the City's performance and obligation to pay under this agreement is contingent upon annual appropriation.
16. **PRICE INCREASES:** The Purchasing Agent reserves the right to increase/decrease prices after the bid has been in place for a minimum of 12-months, when it is in the best interest of the City. Increase/decrease will be determined by the appropriate price index.
